SUMMARY

With over 2.5 years of experience in the dynamic field of software development, I've had the privilege of participating in numerous projects that have contributed to my professional growth. This journey has not only expanded my technical prowess but also honed my soft skills, emphasizing the importance of effective teamwork and communication.

My programming skills are a cornerstone of my career, encompassing a wide spectrum from data structures and artificial intelligence to design.

STACK

Frontend: Javascript, React, SASS, CSS, Material-UI, JQuery, Bootstrap, Tailwind
Backend: NodeJS, Python, Express, ObjectionJS
DB: MySQL, MongoDB
AWS: S3, Lambda, EC2, ECS, ECR
Project management: SCRUM

EXPERIENCE

CURRENT | Entersol (FullStack developer)

In my role as a Software Developer, I've shouldered the crucial responsibility of managing our flagship product, Validex. Each day, I'm focused on resolving bugs and implementing fixes that improve site performance. My efforts have directly contributed to an enhanced platform and a top-tier user experience.

Leveraging my technical knowledge and skills, I've actively contributed to the development and release of new features within Validex. These enhancements have a direct and positive impact on the clients who rely on our product, ensuring a valuable user experience.

My responsibilities have included being the primary point of contact for customer service, taking charge of addressing and resolving customer tickets to ensure a smooth and uninterrupted experience for our clients. My dedication to efficient communication and support has been instrumental in achieving high levels of customer satisfaction.

2022 - 2023 | Vinneren (Frontend developer)

I played a pivotal role in the development of various projects at Vinneren eCommerce, leveraging my technical acumen and proactive approach to meet diverse challenges. My responsibilities encompassed an array of tasks, including:

- Support Resolution: I took the lead in addressing and resolving support issues, ranging from minor glitches to substantial challenges, ensuring uninterrupted service for our clients.
- Custom Component Development: I had the privilege of designing and implementing custom components tailored to user requirements, enhancing the user experience and site functionality.
- Enhanced User Experience: I meticulously fine-tuned site styles, components, and sections to ensure users enjoyed a seamless and enjoyable online shopping experience.

2021 - 2022 | Smart Seguros (Frontend developer)

Led a transformative initiative at Smart Seguros, a prominent insurance company, overseeing the end-to-end development of a comprehensive website. Over a year-long project, I demonstrated proficiency in:

- Frontend Mastery: From conceptualizing a user login/logout system to crafting static website sections, headers, footers, and intricate user interfaces, I curated every aspect of the website.
- Seamless Integration: Bridged the gap between frontend and backend, interfacing with REST APIs to facilitate data exchange. This integration resulted in a responsive, dynamic user experience.
- Customization: Designed adaptable components to meet diverse user and administrator needs, ensuring easy access to insurance data such as policies, insured items, and claims.

2021 | Amazon intership (FullStack developer)

During my dynamic internship at Amazon, I had the privilege of collaborating with a talented group of friends and fellow students to create an entire website that revolutionized the user experience. This ambitious project focused on helping users discover personalized 'hobbies' by leveraging their preferences and recommending relevant Amazon products. In this role, I demonstrated proficiency in: Frontend Mastery and robust Backend development

EDUCATION

2018 - 2022 Bachelor of Science in Computer Systems Engineering - Instituto Tecnologico y de Estudios Superiores de Monterrey (ITESM)
